## The CIUADAELA 28 Meter (92ft) Motorsailer Cruising Yacht

**The Ciudadela 28 Meter (92ft) Motorsailer Cruising Yacht** places special emphasis in *Interior Volume and Deck Space*, which is major prerequisite in comfortable and safe long range cruising. The large Owner's Stateroom, plus two guest cabins have been located in the same area, toward the stern. At full beam below decks you'll find the engine room and large elevated saloon. Access to the machinery space is through the walk - through cold room and special attention has been placed on technical areas for installations.

The cockpit has been expanded in beam and length, with versatile distribution of furniture, creating a grand lounge area and dining room. The permanent Bimini and attention paid to very simplified handling for use with minimum crew, make this yacht attractive to all aboard.

Under motor alone she is capable of 13 knots,(that's 312 nm/day) providing not only enjoyment but security under any weather condition.

Understanding the requirements to create memories, the **Barracuda** team has included a large toy garage, with room enough to safely stow a good sized Tender, Jets Ski and of course Diving Equipment complete with Air Compressor and bottles, leaving even more room for countless other accessories required for global cruising and exploration..
